

FENIX[®] innovative materials are for interior design. Applying proprietary technologies, the external surface of FENIX is characterized by the use of next generation acrylic resins, hardened and fixed through an Electron Beam Curing process. With low light reflectivity, FENIX surfaces are extremely opaque, soft touch and anti-fingerprint. Thermal healing of superficial micro-scratches is also possible. FENIX NTM[®] provides a technical and aesthetic answer to two important interior design trends: smart materials and matte surfaces. A combination that makes this material extremely versatile and suitable for every environment.

COLLECTION

FEATURES

**Low light reflectivity,
extremely matte surface**

Soft touch

Anti-fingerprint

**Thermal healing of
superficial microscratches**
