Composite Panels & Substrates

PRISM TFL is available with a range of ARAUCO's standard and specialty panel substrates and grades so that we can accommodate your design considerations and specifications. ARAUCO manages its own inventories to maintain a current and balanced design offering and a dependable supply you can count on.

Please contact your account representative to discuss our product grades, and for production capability and minimums.

Sustainability

Our substrates are made from wood fiber that is sourced as recycled, recovered, and/or FSC® certified (FSC-C019364) assuring that the wood used in manufacturing is derived from ethical sources. PRISM TFL is manufactured using composite panels that are certified to EPA TSCA Title VI/CARB-2 and meets relevant green building standard requirements, including those found in LEED, Green Globes, IgCC, and the CALGreen Code.

ARAUCO offers cradle-to-gate information through the industry-wide Environmental Product Declarations (EPDs) for particleboard and MDF manufactured in North America.
